

Artem Matiushenko

Front-End Engineer

A motivated front-end developer with 1.5+ years of experience in building user-friendly and visually appealing client-side web applications. Skilled in React.js, JavaScript, TypeScript, HTML, and CSS. I'm committed to staying updated with the latest industry trends and continuously improving myself as a developer.

Experience

Jun 2022 - Nov 2023

Flynk - Junior Front-End Developer

Had an opportunity to collaborate with Australian and Vietnamese teams on multiple start-up projects (e-commerce, enterprise software).

- Supported existing functionality and developed new UI components.
- Worked with micro front-ends architecture based app (Webpack Module Federation plugin).
- Utilized i18next to provide app internationalization.
- Built responsive & adaptive layouts.
- Reviewed code of other developers and contributed to improving code quality and front-end development practices.

Tech stack: React.js, MobX, TypeScript, Less, Ant Design, JavaScript.

Jul 2023 - Sep 2023

Binary Studio - Full Stack Developer Apprenticeship

Completed a 3-month full-stack development apprenticeship at Binary Studio Academy with high honors. During the 6-week period together with 7 other full-stack developers and 2 QA engineers, we've built an AI-powered MVP application for aspiring writers that allows them to practice and improve their writing skills.

Tech stack: TypeScript, React.js, Redux Toolkit, Sass, Vite, Node.js, Fastify, Knex, Objection, PostgreSQL, AWS S3, Socket.io, OpenAI API.

I was responsible for implementing the following:

- Integration with OpenAI API.
- Files uploading to Amazon S3.
- Configuring real-time communication between server and client apps using Socket.io.
- Other full-stack app features.

On graduation day, I had the honor to defend the team project by giving a presentation.

Nov 2021 - Mar 2022

Intellias - Front-End Developer Apprenticeship

Completed an 80-hour course on front-end development (IntelliStart), with a focus on React.js. The course covered the following topics: React.js, Redux, TypeScript, JavaScript, Material UI, HTML, CSS, CSS Preprocessors, Git.

As a final project, in a team of 5 front-end developers we built a front-end application for tracking personal budget.

Tech stack: React.js, Redux Toolkit, JavaScript, Material UI.
